Members of the SSG have already established close working relationships with desk officers in ARA, AID and INR. Next week they expect to extend their range of working contacts to other interested agencies.

Guidance for the studies is contained in the paper "Alliance for Progress Strategic Studies Group, General Statement and Questionnaire," dated February 26. Copies of this have been provided to the interested agencies. Initial dissemination is being made to our field missions as each country study is initiated. In each case a letter to the Ambassador has stressed that the questionnaire is only to keep the Country Team current on the nature of the study being made here, and that it involves no additional field reporting.

Supporting assistance (in addition to providing the key personnel for the SSG) has come rapidly. S/P is preparing a number of studies, including a balance of payments strategy paper and one on redistribution of wealth and income. INR has contributed valuable country studies on land reform. DOD has made available concise formulations of MAP planning for the countries under study. Similar support from other agencies is on the way.
